

## New products for facility systems

Our range of customized and innovative products extends from efficient air outlets for commercial & industrial applications and cooling/heating systems designed as combined air-and-water systems through to facade-mounted ventilation units. All our products are easy to install and some of them are unobstructive or even "invisible" once installed.

Our newest products too are characterized by aesthetic design combined with an outstanding level of functionality and are intended for a wide range of applications. Relevant product details are contained in our website mentioned below.
